Portfolio

Summary

Final-year B.Tech CSE student skilled in Java, Data Structures & Algorithms, SQL, and Full-Stack Development. Experienced in building full-stack applications using React.js, Node.js, Express.js, MongoDB, and REST APIs, with hands-on experience in AI-enabled software development.

Skills

Programming Languages: Java, Python, C

Web & Backend: React.js, Node.js, Express.js, REST APIs, HTML, CSS, JavaScript

Databases: MongoDB, MySQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

AI/ML: Machine Learning, Scikit-learn, Recommendation Systems, Pandas, NumPy

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Altair AI Studio (RapidMiner)

Experience

Siemens Industry Readiness Program (SIRP)

Jul 2026 – Sep 2026

Siemens Digital Industries Software

- Successfully completed the Siemens Industry Readiness Program with exposure to industry-relevant software technologies and development practices.
- Built hands-on competency in RapidMiner and Mendix through structured technical learning and practical activities.

AI Virtual Internship

May 2025 – Jun 2025

Edunet Foundation

- Applied AI/ML fundamentals to build, train, and deploy AI solutions for real-world applications.
- Built LeafLens AI, a deep-learning-based plant disease detection application using computer vision and machine learning.

Projects

QueueCure — React.js, Node.js, Express.js, MongoDB, Socket.IO

May 2026

- Built a full-stack hospital queue management system using **React.js, Node.js, Express.js, MongoDB, and Socket.IO**, supporting appointment booking, token generation, live queue tracking, role-based dashboards and analytics.
- Developed REST APIs with JWT authentication and role-based access control for Patients, Doctors, and Receptionists.
- Implemented real-time communication using Socket.IO to synchronize queue updates across patient, receptionist, doctor, and display dashboards.

Focus Tracker — React.js, TypeScript, Node.js, Express.js, MongoDB, Chrome Extension

Feb 2026

- Developed a full-stack productivity tracking system with a Manifest V3 Chrome Extension for real-time website usage monitoring and classification of productive and distracting websites.
- Implemented JWT authentication and email OTP verification with Node.js and Express.js
- Built an interactive analytics dashboard using Recharts to visualize website usage patterns through pie and bar charts, with configurable productive and distracting website lists.

HCARM (Context-Aware Recommendation Model) — React, FastAPI, Python, Sentence Transformers

Jun 2026

- Developed an AI-powered recommendation system combining semantic similarity, product ratings, popularity, and price signals to generate context-aware product recommendations beyond keyword matching.
- Implemented transformer-based semantic embeddings using Sentence Transformers and a hybrid ranking mechanism over a dataset of 50,000+ products.
- Added explainable recommendations that provide reasons for product selection based on ranking signals.

Achievements

- Shortlisted among the Top Scorers from 100K+ registrants in the Aspire For Her × Logitech Women Who Master Hackathon 2026, advanced to the Zonal Round and built VentureSakhi, an AI-powered application on AWS PartyRock.
- GirlScript Summer of Code (GSSoC) 2026 – Contributor, AI Agents Track, contributing to open-source development through the program.

Certifications

- NPTEL (Silver) – Affective Computing & Foundations of AR and VR
- APSSDC – Data Analysis Using Python
- HackerRank – Java & SQL Certifications
- Cisco – Python Essentials

Education

Bachelor of Technology, Computer Science and Engineering

2023 – 2027

Sagi Rama Krishnam Raju Engineering College, Bhimavaram

CGPA: 9.49

Intermediate

2021 – 2023

BIIT Junior College, Guntur

Percentage: 98%

SSC

2020 – 2021

Bhashyam High School, Kaikalur

Percentage: 99.5%
